Case Study: AEGON Religare

eDynamic successfully develops an Intranet on the SharePoint platform for AEGON Religare, a leading life insurance services provider

About Client

AEGON, an international life insurance, pension and investment company, Religare, one of India’s leading integrated financial services groups and Bennett, Coleman & company, India’s largest media house, have come together to launch AEGON Religare Life Insurance Company Limited. Launched in July 2008, AEGON Religare has over 57 branches spread across India. With customer centric approach, AEGON Religare is now on its way to become the world’s leading Life Insurance provider.

Summary

AEGON Religare Life Insurance wanted to develop an Intranet that would provide their employees with a robust collaboration platform. The intended goal of this intranet was to create an effective and secure medium for communication and collaboration, enhanced knowledge management & process management.

Challenges

- Create an effective and secure medium for communication and collaboration.
- Enhanced knowledge management & process management.
- Provide employee access to company documents, scheduling tools.
- Publish information corporate wide.
- Share information easily regardless of geographical boundaries.
- Save time, effort & expenses in reviewing and organizing most updated information.
- Provide the bigger picture on organization wide activity by aggregating & presenting information at a convenient & accessible central location.

Client Requirements

AEGON Religare wanted a solution that:
- should be well adopted in the market in terms of customer base.
- should provide a large number of customizable & ‘out of the box’ features that cover most of AEGON’s intranet needs.

www.edynamic.net
Case Study: AEGON Religare

- should be flexible as well as scalable over the long term.
- should have a license/access/usage model that is favorable to a large number of potential AEGON end user.
- should have accessibility over intranet as well as on the internet.

eDynamic’s Approach

- Conducted meetings with the core team & key stakeholders to identify and prioritize business objectives.
- Setup a core team that participated in the Analysis & Design Sessions – critical to get their perspective.
- Considered the requirement of AEGON for a flexible as well as scalable solution over the long term.
- Considered the un-paralleled capabilities of Windows SharePoint Server Platform.
- After several considerations, eDynamic selected WSS for a standard Intranet deployment.

Benefits

- A robust collaboration and document sharing standard platform.
- Implementation of a standard Intranet deployment for its un-paralleled capabilities.
- Unified information to allow members of the organization to create, share and publish documents from a single access point.
- Improved workflow and information management for AEGON Religare.
- Improved functionality — take advantage of records management, search, workflows, and more.

The Solution - Document Management

- Migrated Basic & Advanced document search based on document’s meta data.
- Document 3,000+ documents from local drives to SharePoint.
- Implemented Center Site Collections.
**The Solution - Attendance Marking**

eDynamic has developed an attendance marking functionality for AEGON. It is an efficient, time saving and easy way to report, view and to mark attendance. It provides fast and efficient way to mark attendance which saves time and overhead in marking and calculating attendance. You can view and print reports - employee wise or department wise for a particular day or for a period of duration.

**The Solution - Workflow**

**Workflow Process:** Workflows have been stored as workflow templates on the Intranet. eDynamic has created a SharePoint workflow template and deployed it to the AEGON website. We have also utilized administration tools to add the template to a library. Users can now start a workflow instance to process any item in the library or list.
